

# Tableau Intro & Tableau Product Family

# Why TABLEAU?

- Tableau is a Data Visualization Software. Data visualization is the process of describing information through visual rendering.
- Tableau leads the world in making the data visualization process available to business users of every background and industry.
- It connects easily to nearly any data source, be it corporate Data Warehouse, Microsoft Excel or web-based data.
- Tableau allows for instantaneous insight by transforming these data into visually appealing, interactive visualizations within minutes through the use of Drag and Drop Interface.

# Tableau - Gartner's Magic Quadrant

- For 8 year in a row , Tableau is a leader in the Magic Quadrant for Business Intelligence and Analytics Platforms Report.
- Gartner is world's leading IT Research and Advisory Company

# PRODUCTS OFFERED BY TABLEAU

Tableau offers five main products:

- 1) Tableau Desktop → Paid
- 2) Tableau Server → Paid
- 3) Tableau Online → Paid
- 4) Tableau Reader → Free
- 5) Tableau Public → Desktop & Server → Free

# Difference Between Tableau Desktop, Server and Online

- Tableau Desktop is used to visualize and analyze data, create workbooks, visualizations, dashboards and stories and you can then publish these to Tableau Server, Tableau Online and Tableau Public.
- Tableau Server and Tableau Online allow you to safely distribute the interactive workbooks to the right people. You can edit workbooks, visualizations, dashboards and stories in Server or Online, but you can't produce new ones. The editing options are limited compared to the Desktop.
- Tableau Server is Hosted by the Company who purchases it ( managing the Hardware ) while Tableau hosts Tableau Online (i.e. Tableau manages the Server for the Company as a SaaS ( Software as a Service ) Model )

# Tableau Desktop - Analytics Anyone Can Use

- Tableau Desktop is a data visualization application that lets you analyze virtually any type of structured data and produce highly interactive, beautiful graphs, dashboards, and reports in just minutes.
- You can connect to any data source from spreadsheets to data warehouses.
- You can build and interact with views of data.
- Views allow you to query, display, analyze, filter, sort, group, drill down, drill up, calculate, organize, summarize, and present the data quickly.
- Combine multiple views of data into a single dashboard. Insert web pages, images and documents for better storytelling and faster insight.

# Tableau public

- Tableau Public is a free service that lets anyone publish interactive data to the web.
- Once on the web, anyone can interact with the data, download it, or create their own visualizations of it.
- Tableau Public is for anyone interested in understanding data. Writers, bloggers, students, professors, hobbyists, journeymen, critics, citizens and more.
- It's also meant for organizations, but only as an introductory service; i.e. if your organization wants to put data online for the public.

# What Can & Cannot be done with Tableau Public Desktop

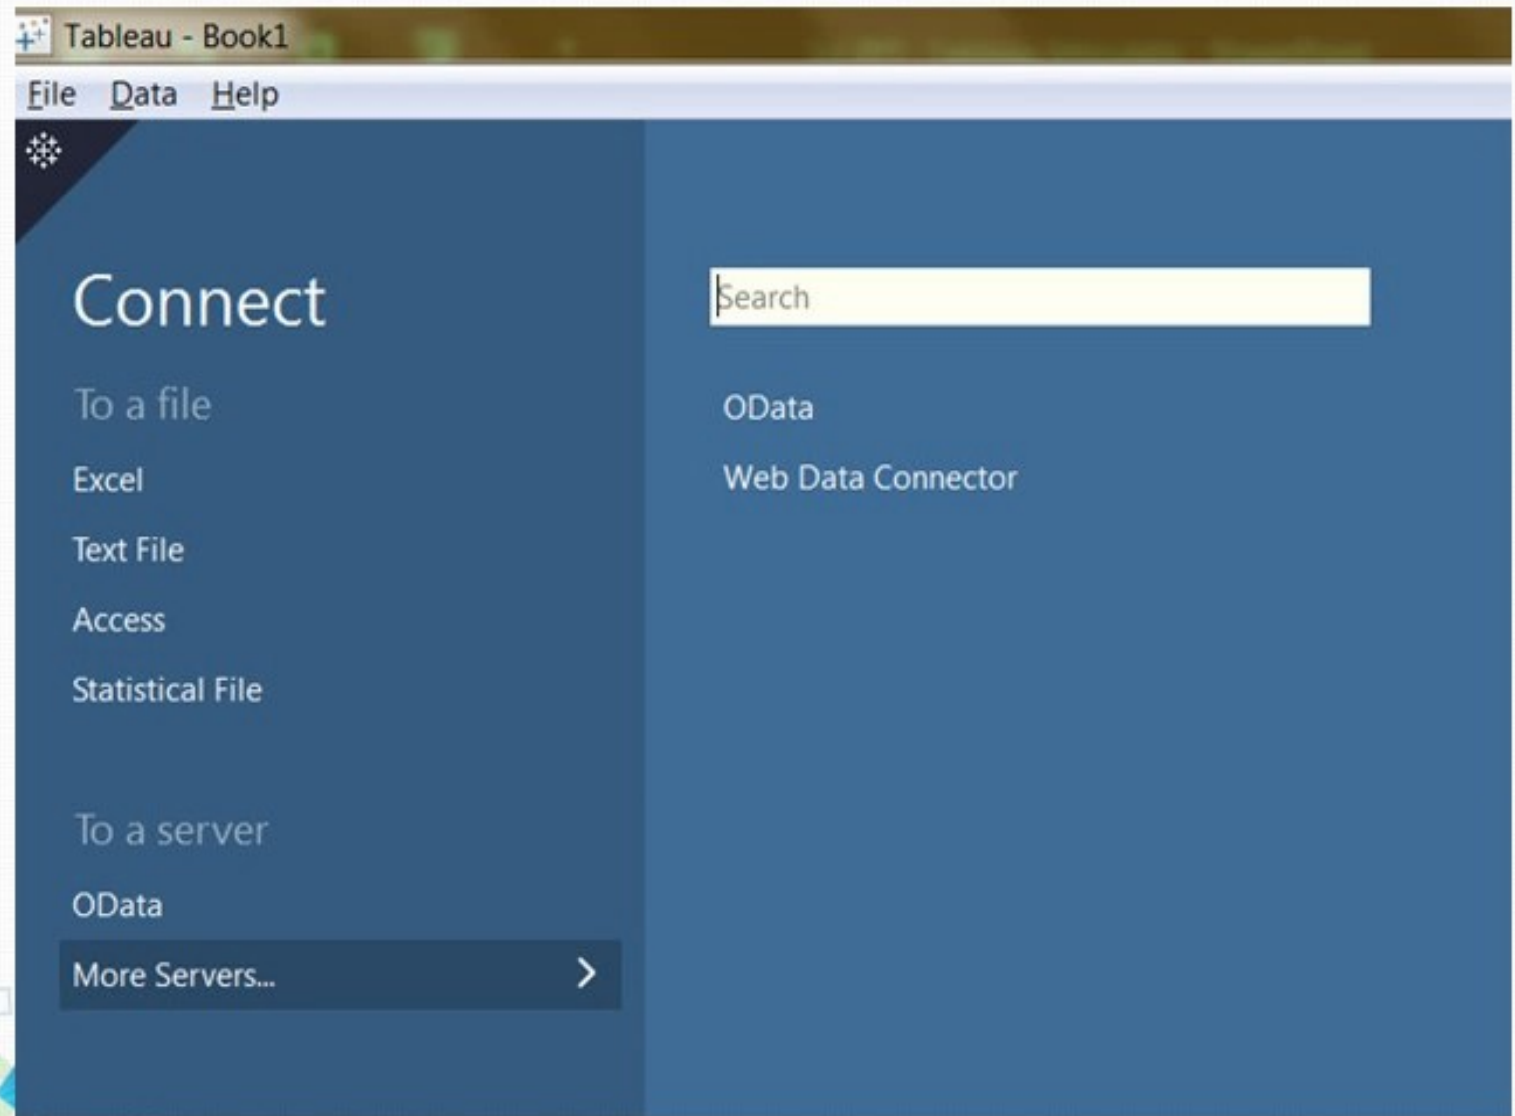

- Tableau Public Desktop can connect to Microsoft Excel, Microsoft Access, and text files.
- You can Save your Files only on Tableau Public Server. For each account 10 GB of space is provided.
- It has a limit of 1 million rows of data that is allowed in any single connection.

# Data Sources that can be Connected Through Tableau Public Desktop

6 Data Sources :  
As shown in the  
Screen .

You can not save  
it on your Local  
System and need  
to save on  
Tableau Public  
Server

# TABLEAU SERVER - Analytics for Organizations

Tableau Server, by Tableau Software®, is an online solution for sharing, distributing, and collaborating on content created in Tableau.

- **Shareable.** Tableau Server users can create workbooks and views, dashboards, and data sources in Tableau Desktop, and then publish this content to the server.
- **Secure.** Tableau Server *site* and *server* administrators control who has access to server content to help protect sensitive data. Administrators can set user permissions on projects, workbooks, views, and data sources.
- **Mobile.** Users can see and interact with the most up-to-date server content from anywhere, whether they use a browser or mobile device.

# TABLEAU ONLINE - Cloud Analytics for Organizations

- Tableau Online, by Tableau Software®, is a secure, cloud-based solution for sharing, distributing, and collaborating on Tableau views and dashboards.
- Tableau Online puts the flexibility and ease of a powerful cloud-based data visualization solution to work for you—without servers, server software, or need for IT support.

# Tableau server / online - How it Looks like

The screenshot displays the Tableau Server web interface. At the top, the Tableau logo is on the left, and user information 'Site: Ashley Testing', 'Help', a star icon, and 'Austin Smith' are on the right. Below the header, a navigation bar shows 'Workbook: Variety' and 'In Project: Default'. A secondary bar contains links for 'Delete', 'Permissions', 'Tag', 'Scheduled Tasks', and 'Download Workbook'. The left sidebar features a 'Content' tab with a list of items: 'Projects' (2), 'Workbooks' (4), 'Views' (20), and 'Data Sources' (11). Below this is a 'Filters' section with a search bar and several filter categories: 'PROJECT' (Any Project), 'OWNER' (Any Owner), 'TAG' (Any Tag), 'MODIFIED ON OR AFTER' (Any Date), 'MODIFIED ON OR BEFORE' (Any Date), 'FAVORITES' (Show Only Favorites), and 'RECENTLY USED' (Show Only Recently Used). The main content area is a grid of eight dashboard thumbnails, each with a title and a small icon: 'SAT Performance' (line and area chart), 'Oil Well Management' (scatter plot and bar chart), 'Oil Well Benchmarks' (scatter plot with trend line), 'Baseball Statistics' (table view), 'Home Runs vs. Strike Outs' (scatter plot), 'Avg by Subject' (table view), 'Baseball Heat Map' (heatmap), and 'Country Detail' (table view).

Tableau Server Interface Overview:

- Header:** Tableau logo, Site: Ashley Testing, Help, Star icon, Austin Smith.
- Navigation Bar:** Workbook: Variety, In Project: Default, Delete, Permissions, Tag, Scheduled Tasks, Download Workbook.
- Left Sidebar:**
  - Content:** Projects (2), Workbooks (4), Views (20), Data Sources (11).
  - Filters:** Search for content, PROJECT (Any Project), OWNER (Any Owner), TAG (Any Tag), MODIFIED ON OR AFTER (Any Date), MODIFIED ON OR BEFORE (Any Date), FAVORITES (Show Only Favorites), RECENTLY USED (Show Only Recently Used).
- Main Content Area (Grid of Dashboards):**
  - SAT Performance:** Line and area chart showing SAT performance over time.
  - Oil Well Management:** Scatter plot and bar chart showing oil well data.
  - Oil Well Benchmarks:** Scatter plot with a trend line showing oil well benchmarks.
  - Baseball Statistics:** Table view showing baseball statistics.
  - Home Runs vs. Strike Outs:** Scatter plot showing the relationship between home runs and strike outs.
  - Avg by Subject:** Table view showing average scores by subject.
  - Baseball Heat Map:** Heatmap showing baseball data across different categories.
  - Country Detail:** Table view showing detailed information about countries.

# TABLEAU READER

- Tableau Reader is a free application that lets anyone view and interact with Tableau packaged workbooks.
- These packaged workbooks are created using Tableau Desktop, and are self-contained documents that combine the data and the Tableau visual analysis into a single file.
- Tableau Reader makes it possible to share your visualizations and dashboards with anyone – without the need for them to have a Tableau Desktop license.

With Reader, people can be viewing, filtering, printing and understanding your visualizations and dashboards in minutes.

# Tableau

## Installation of Tableau Public for Hands On

Go to Chrome and search for Tableau Public Download. The search will take you to the below page where you need to enter your email id and "Download the App".
